EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard Roos on 3/31/04.

The claims have been amended as follows:

1. (Currently Amended) An ink jet head deforming a pair of partition walls sandwiching ~~[[a trench-like]]~~ an ink chamber trench to discharge ink from said ink chamber by having an inside electrode formed in the ink chamber at each inner side plane of said pair of partition walls and electrically connected to an external drive circuit, and applying a driving pulse from said external drive circuit to said inside electrodes, comprising:

a substrate having said partition walls constituted by forming ~~[[an]]~~ said ink chamber trench from one end plane to another end plane; and

a filling member formed between said pair of partition walls at said another end plane of said ink chamber trench,

wherein an end plane of said inside electrode located only within said ink chamber trench is exposed at said another end plane, said external drive circuit is electrically connected to said inside electrode at said another end plane, and an ink supply opening to supply ink to said ink chamber trench is provided at said another end plane side, and

wherein said [[trench-like]] ink chamber trench extends from said one end plane to said another plane and maintains a constant depth.

18. (Currently Amended) The inkjet head according to claim 1, [[further comprising a filling member to establish occlusion between said pair of partition walls at said another end plane of said ink chamber trench,]]

wherein said filling member includes a substance of one of a conductive resin and an insulative resin.

Canceled claims 21-26.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4, 6-8, 10-20, directed to the

Art Unit: 2861

other species no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 21-26, directed to method of fabricating an ink jet head remain withdrawn from consideration as required by the restriction requirement set forth in the previous office action.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicants are advised that if any claims depending from or including all the limitations of the allowable generic linking claim be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

This application is in condition for allowance except for the presence of claims 21-26 to an invention non-elected without traverse. Accordingly, claims 21-26 have been cancelled as set forth above.
